

California Community Colleges Offer Technical Education for Rewarding Careers

What could you do in Aerospace Fastener Manufacturing Technology?

- Make fasteners used to attach airplane wings to the fuselage
- Produce the rivets that hold communication satellites together
- Use strong, lightweight metals to create fasteners for race cars
- Fabricate fasteners sent into space on rovers and space stations
- Manufacture fasteners used to affix components in commercial jets

Earn certificates, an AS degree or transfer.

EL CAMINO COLLEGE COMPTON CENTER

Aerospace Fastener Manufacturing

One of many California Community College programs that offer effective industry-based training that prepares students for employment.

Succeed in the Aerospace Industry

Accelerate your career with upgraded skills or break through into an industry with excellent employment prospects. El Camino College Compton Center is located in the heart of the aerospace industry. The program was developed in partnership with the Industrial Fasteners Institute (IFI) and can lead directly to employment with aerospace companies.

Compton Center has the only community college Aerospace Fastener program in the western United States.

Gain practical knowledge and the skills you'll need on the job. In the expansive lab, learn to use specialized tools and manufacturing equipment to produce and inspect aerospace fasteners. Students can also test for National Association of Metal Working Skills (NIMS) certification.

Find Your Opportunity

Students have an excellent track record of securing internships and employment as technicians in aerospace fastener manufacturing. The college worked with industry to design courses and assure that essential topics are covered to speed up career advancement.

Entry level salaries start at \$12/hr. and can quickly accelerate to \$35/hr. when work experience is combined with certifications. Graduates work for, Alcoa Fastening Systems, California Screw Products, LISI Aerospace, Northrup Grumman, P.B. Fasteners, Space X and many other firms.

Get the job training that California industries need at your local community college.

FIND INDUSTRY SPECIFIC TECHNICAL TRAINING AT COMMUNITY COLLEGES

To locate programs at other California Community Colleges,

1. Go to: www.californiatechedresources.org
2. Select: CC Technology Programs
3. Under school programs, select from over 60 technical subjects. Click the plus sign to get a listing of colleges offering programs in that subject.
4. Use the map to find programs near you.
