

California Community Colleges Offer Technical Education for Rewarding Careers

What could you do in Additive Manufacturing?

- Invent medical devices that enhance health
- Create characters used with special effects in movies
- Plant the seed of a high tech manufacturing boom in California
- Produce parts used in aerospace, construction and manufacturing
- Develop beautiful architectural fixtures for commercial buildings

Earn a certificate or AS degree in Rapid Digital Manufacturing.

SADDLEBACK COLLEGE

Rapid Digital Manufacturing

One of many California Community College programs that offer effective industry-based training that prepares students for employment.

Gain Cutting Edge Skills

This one-of-a-kind community college program teaches 3D design and additive manufacturing – a process of adding layers of material to build up an object rather cutting away at material. Work with students who are passionate about creating and getting a jump start on a career in this dynamic field.

“I get instant gratification when I see my design turned into a product.”

Learn through hands-on projects in a lab fully equipped with rapid prototyping machines, laser cutters, mold and model making equipment and other industry standard tools used in design, engineering, architecture and advanced manufacturing. Combine your imagination with drafting, industrial design, architecture, business and programming skills to develop unique products quickly and cost-effectively.

Find Your Opportunity

Train to become a rapid prototype technician, product designer, medical model maker, industrial designer or architectural model maker. Salaries range from \$60,000 to over \$100,000.

Graduates are sought after and quickly find positions working closely with engineers, designers and professionals in art, entertainment, architecture, design and manufacturing industries.

Get the job training that California industries need at your local community college.

FIND INDUSTRY SPECIFIC TECHNICAL TRAINING AT COMMUNITY COLLEGES

To locate programs at other California Community Colleges,

1. Go to: www.californiatechedresources.org
2. Select: CC Technology Programs
3. Under school programs, select from over 60 technical subjects. Click the plus sign to get a listing of colleges offering programs in that subject.
4. Use the map to find programs near you.

California Community Colleges Industrial and Technical Education Collaborative
