

California Community Colleges Offer Technical Education for Rewarding Careers

LOS ANGELES TRADE-TECH COMMUNITY COLLEGE

Renewable Energy

One of many California Community College programs that offer effective industry-based training that prepares students for employment.

What can you do in Energy Efficient Construction?

- Retrofit houses to reduce energy use
- Connect cost-saving thermal water heaters
- Install photovoltaic (PV) collectors for utility farms
- Recommend weatherization to save residents money
- Build efficient solar buildings that will use less energy

Earn certificates or an AS degree in Renewable Energy.

Learn more at:
www.lattc.edu

Build Your Skills

Gain energy efficient construction skills to start-up or power your career at Los Angeles Trade-Tech (LATTC), the largest community college construction program in California.

- Join over 4000 electricians who have been trained at LATTC
- Benefit from hands-on experience and instructors who have come from industry
- Learn using industry standard tools and materials in well-appointed labs and test houses
- Earn BPI, EPA and NABCEP industry certifications
- Attain college certificates of achievement for Solar PV Technician, Solar Thermal Technician, Weatherization and Energy Efficiency, and Energy Systems Technology Fundamentals
- Take general education courses and complete a Renewable Energy AS degree emphasizing Solar PV, Solar Thermal or Energy Efficiency

Find Your Opportunity

From entry-level laborers to journeymen electricians, your career will benefit from specialized renewable energy training. Entry level laborers start at \$15 per hour and with experience may earn as much as \$40 per hour.

LATTC graduates are hired by:

- **Municipalities** such as City of Long Beach and Los Angeles Department of Water & Power
- **Utilities** including PG&E and Southern California Edison
- **Companies** such as REC Solar and Solar City, and many other HVAC, electrical and building contractors

Get the job training that California industries need at your local community college.

FIND INDUSTRY SPECIFIC TECHNICAL TRAINING AT COMMUNITY COLLEGES

To locate programs at other California Community Colleges,

1. Go to: www.californiatechedresources.org
2. Select: CC Technology Programs
3. Under school programs, select from over 60 technical subjects. Click the plus sign to get a listing of colleges offering programs in that subject.
4. Use the map to find programs near you.

California Community Colleges Industrial and Technical Education Collaborative
